

Harmonizing New Orleans: Our Vision and Mission

Harmonizing New Orleans is a coalition of people committed to enhancing the overall quality of life and continuing the fresh start that has already begun since Katrina. The people involved at the grass roots level have a deep love for New Orleans and come from a broad range of personal and professional training and experience. Many have devoted a lifetime to sharing and learning various methodologies of energy balancing practices. All share a passion for personal growth, professionalism, and environmental well being. Collectively we offer a variety of knowledge and skills from many areas including the science of BioGeometry and other environmental healing approaches.

We have come together to support creating harmony in living systems, man made energy fields, and all types of structures in our city. We have found that the proliferation of electrical fields have influenced natural earth grid lines and is bringing people, plants, animals, and the earth increasingly out of balance. ***Harmonizing New Orleans*** is utilizing scientifically proven simple solutions to restore this balance. In fact, the more detrimental the energy fields may have been...the more beneficial it can become over time.

The ***Harmonizing New Orleans*** coalition is raising money to purchase and strategically utilize specially designed resonators that have been imprinted with life supporting geometric shapes and the 64 mineral patterns. These resonators were designed to purify the atmosphere, heal trees, and minimize all kinds of environmental toxins in land and water. They restore and maintain the vitally important minerals, which have been gradually leached out over time due to industrial and electro pollution. Minerals are the building blocks to all life forms. Re-mineralization increases the vitality of our beautiful and unique historic trees as well as other vegetation through out the city.

Harmonizing New Orleans is dedicated to raising awareness, inspiring action and facilitating scientifically proven solutions at a foundation level. Specifically, our intention is to raise the funds in order to provide these energetic interventions that both detoxify and revitalize the environment. We are following a model that has already been implemented in several other cities as part of various research projects involving Dimensional Designs, the Vesica Institute, Living Design Consultants and Dr. Michael Maley, PhD, LP. This work has been scientifically validated by Glenn Rein PhD at Quantum Biology Research Lab and Robert Gilbert PhD of Vesica Institute. Dr. Gilbert is a former U.S. Marine Corps Instructor in the field of Nuclear-Biological-Chemical Defense, who has been involved with detecting and protecting against harmful radiations for over 25 years, using both scientific protocols and Vibrational energy science methods.

In our present day, we are becoming more and more aware of the benefits of energy balancing and the uplifting of resonance when it comes to human beings. The same applies to our earth. She needs our caring and support to find her proper balance, and health.

The fall of New Orleans has provided the opportunity to create a new foundation for sustainability. From the mud the lotus blooms with beauty. New Orleans has the opportunity to bloom with new life, harmony and wisdom and become an inspiration for others to follow.

We invite you to find out more about this work and to contribute financial support for this project. Contact Living Design Consultants at www.livingdesignconsultants.com or call **985-630-9370**.
